PROFESSIONAL SUMMARY

Engineering graduate with hands-on experience building and deploying software applications using Java, Spring Boot, REST APIs, SQL databases, and React. Strong foundation in object-oriented programming, data structures and algorithms (250+ problems solved), and problem-solving, gained through academic projects and internship experience. Seeking an entry-level Software Developer / Engineer role to contribute to backend, full-stack, and cloud-based development.

EDUCATION

P.S.R Engineering College — **Sivakasi, India**
Bachelor of Engineering, Electronics and Communication Engineering | *CGPA: 8.1* — *2023 – 2026*

P.S.R Polytechnic College — **Sivakasi, India**
Diploma in Electronics and Communication Engineering | *Percentage: 85%* — *2020 – 2023*

EXPERIENCE

Bluon Tech — **Remote**
Web Development Intern — *Jun 2023 – Sep 2023*

- Built 8+ responsive, cross-browser web pages using HTML, CSS, JavaScript, and React.js, improving UI consistency across devices.
- Delivered 5 feature enhancements to a live production website while collaborating with a remote engineering team.
- Used Git/GitHub pull requests for code review across a remote team.

PROJECTS

Email AI Reactor with Gemini AI Integration | *Java, Spring Boot, REST APIs, React, Gemini AI, Vercel* — GitHub

- Built a full-stack AI email assistant in Java, Spring Boot, and React that uses Gemini AI to generate context-aware, tone-specific replies; tested by 5+ users.
- Developed RESTful APIs and integrated Gemini AI through Spring WebClient for real-time response generation, using a modular, service-oriented design.
- Created a responsive Material-UI frontend and a companion Chrome Extension for in-browser access to AI-generated replies.

ServicePro: Field Service Management Platform | *Java, Spring Boot, Spring Security, JWT, React, TypeScript, PostgreSQL, AWS, Docker, Groq AI* — Live Demo

- Built a full-stack field service platform in Java 21, Spring Boot and React (TypeScript) with role-based access for 5 roles (Admin, Manager, Technician, Customer, Inventory Manager), covering the flow from service request to assignment, work order, parts and invoice.
- Integrated Groq LLMs through a server-side proxy for AI request triage, technician assignment, work-log summaries and an assistant chat, using JSON-mode output, rate limiting and automatic model fallback.
- Secured the app with Spring Security and JWT refresh cookies, and built an in-house email OTP verification using HMAC codes, rate limits and signed proof tokens. Added live technician tracking over WebSockets.
- Deployed the Spring Boot API in Docker on AWS EC2 (ECR, SSM Parameter Store, Caddy HTTPS) with a GitHub Actions CI/CD pipeline using OIDC, and the React frontend on Vercel with a Neon PostgreSQL database. This cut API cold start from about 190 s to 18 s.
- Made the UI responsive across phone, tablet and laptop, with tables that become cards on phones. It supports 14 languages.

TECHNICAL SKILLS

Languages: Java, C, Python
Backend: Spring Boot, Spring MVC, Spring Security, JWT, REST APIs, Spring Data JPA, Hibernate, Spring WebClient, WebSockets
Frontend: HTML, CSS, JavaScript (Basics), React.js (Basics), Material-UI
Databases: MySQL, Neon
Cloud and DevOps: AWS (EC2, ECR, SSM), Docker, GitHub Actions (CI/CD), Caddy, Vercel, Render, Netlify
Developer Tools: Git, GitHub, Maven, IntelliJ IDEA, Postman
Core Concepts: OOP, Data Structures and Algorithms, Java Collections, Exception Handling, Networking Basics

CERTIFICATIONS

Java Core, JavaScript, Full Stack Java Developer, Cloud AWS – Udemy
Python – Skills India
Data Structures and Algorithms; LLD, Networking and DBMS – Take U Forward

LEADERSHIP AND ACHIEVEMENTS

- **1st Prize, Ideathon,** Kalasalingam University – presented an Advanced Electric Vehicle Charging Technology solution among competing teams (Aug 2024).
- **Participant, Wonders of AI Hackathon,** Kalasalingam University – built AI-based solutions in a 24-hour team hackathon (Aug 2024).
- Solved **250+** Data Structures and Algorithms problems.
